Class A Fire Rated, Ortex™ Cement Stucco Color Coat

Ortex is Texston's high-performance exterior stucco color coat and is **Class A** fire rated.

Class A products are the highest level of fire resistance and can withstand exposure to fire without igniting or spreading flames quickly. These materials are considered the safest in terms of fire protection.

Ortex is an exceptional product designed for the quality-conscious end user. It outperforms traditional stucco thanks to its proprietary components, which enhance its durability, flexibility, and resistance to cracks, scratches, and water intrusion.

- Available in a fine and coarse aggregate that can be smooth, extra-smooth, pitted, or sand finish.
- Standard and custom colors available. Easy to apply and can be polished.
- Weather and moisture resistant up to 93.1 mi./h of wind driven rain.

Ortex™ Superior features:

- Surface Burning Characteristics of Building Materials when applied over inorganic cement board: Ortex™ Color Coat conforms to **Class A** finish with 0 Flame Spread and 10 Smoke Density per **ASTM E84** and **CAN/ULC S102.-10**.
- Crushed angular carbonate mineral rock: creates interlocking of the individual stones and promotes durability, flexibility and longevity.
- Washed baked super clean sand: eliminates dust and debris and promotes superior adhesion and cohesion.
- Hydrophobic: promoting water-repellency and water retention and helps prevent efflorescence, mold and promotes ease of installation.
- Microfibers: invisible and promotes water-retention during the application and curing process, minimizing cracks due to rapid contraction and increased flexibility.
- Dry polymers: promotes a stronger bond, flexibility and water-repellency.
- Iron Oxide and other quality powder pigments promoting color fade resistance.
- Water-Soluble color packs: promoting easy mixing and eliminates airborne and spillage waste.
